The map shows a topographic view of the study area. The Rhine river is prominent, flowing from the top left towards the bottom right. Several settlements are marked, including Hatzelsbühl, Jockgrim, and Worth am Rhein. A red rectangle highlights the specific study area, which is located near the confluence of the Rhine and a tributary. The map also shows various roads, railways, and smaller settlements like Leimersheim and Burgdorf. A scale bar at the bottom left indicates a scale of 1:75,000.
